

## Ques 1: Create your own new custom VPC

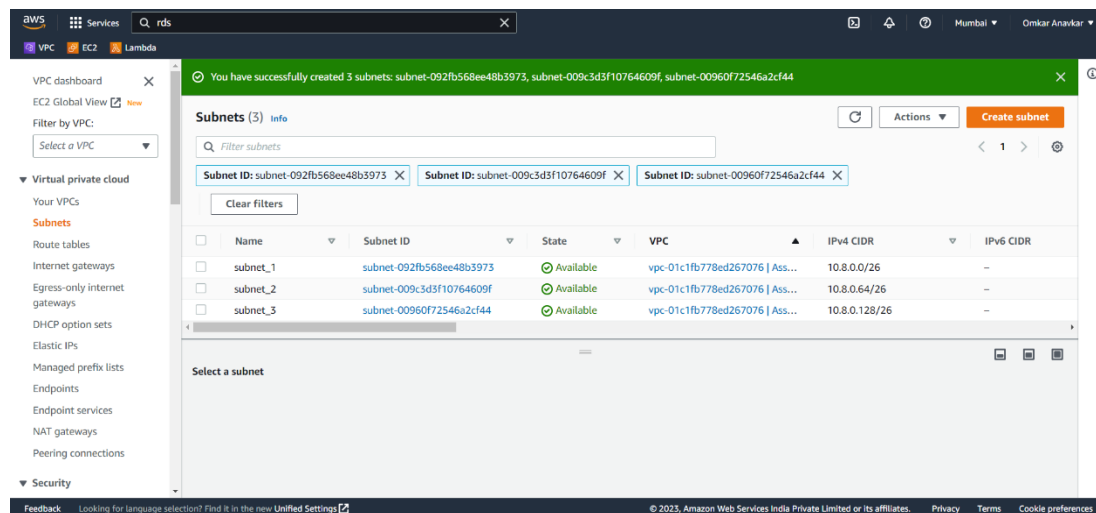

- And configure your EC2 linux instance inside your custom VPC

Custom VPC : Assignment\_7 (vpc-01c1fb778ed267076)

- and then create 3 subnets of that VPC

Three subnets created. (subnet\_1, subnet\_2, subnet\_3)

- Attach an internet gateway to your custom VPC

Internet gateway 'IG-assignment' is connected to custom VPC.
